

PRODUCT DATA SHEET

WSFA-2 Mixture (qualitative)

Catalog No: 1106

Common Name: water soluble fatty acid mixture

Solubility: water

Storage: room temperature

Components: acetic acid, propionic acid, isobutyric acid, n-butyric acid, isovaleric acid, and n-valeric acid

Appearance: liquid

GC Conditions:

Column: Nukol

Carrier Gas: helium

Make-up Gas: nitrogen

Split Ratio: 100:1

Oven Initial: 140°C

Detector (FID): 220°C

Linear Velocity: 20cm/sec

Flow Rate: 40ml/min

Vent Flow: 70ml/min

Program Rate: isothermal

Injector: 220°C

GC elution order:

1. Acetic acid
2. Propionic acid
3. Isobutyric acid
4. n-Butyric acid
5. Isovaleric acid
6. n-Valeric acid

Application Notes:

This mixture contains several water-soluble fatty acids and is ideal for their identification by gas chromatography, mass spectrometry, and high performance liquid chromatography and is prepared from high purity stock materials.. Knowledge of the fatty acid content of bacteria can be of great benefit in understanding microbials and can be of great nutritional importance in animals and humans.^{1,2,3} This is a qualitative mixture and should not be used for quantitative purposes.
