**PRODUCT DATA SHEET**

**N-Docosanoyl-glucopsychosine**

**Catalog number:** 1531  
**Synonyms:** N-C22:0-Glucocerebroside; N-Docosanoyl-beta-glucosylsphingosine  
**Source:** semisynthetic, bovine buttermilk  
**Solubility:** chloroform  
**CAS number:** 119242-44-3

**Molecular Formula:** C_{46}H_{89}NO_{8}  
**Molecular Weight:** 784  
**Storage:** -20˚C  
**Purity:** TLC: >98%; identity confirmed by MS  
**TLC System:** chloroform/methanol/DI water (65:25:4)  
**Appearance:** solid

**Application Notes:**
This cerebroside product is a well-defined glucosylceramide containing docosanoic acid acylated to the ceramide making it ideal as an internal standard and for biological systems. Glucosylceramide is a major constituent of skin lipids where it has an important role in lamellar body formation and in maintaining the water permeability barrier. Glucocerebroside is very important due to its function as the biosynthetic precursor of lactosylceramide and from there of most of the neutral oligglycolipids and gangliosides. Glucocerebroside is the only glycosphingolipid that is found in plants, fungi, and animals and is one of the most abundant glycosphingolipids in plants. Due to the relatively high melting point of cerebrosides (much greater than physiological body temperature) they have a para-crystalline structure. Glucocerebrosides tend to be concentrated in the outer leaflet of the plasma membrane in lipid rafts. It has been reported that glucocerebrosides are essential for the activity of tyrosinase (a key enzyme in melanin biosynthesis), to elicit defense responses in plants, and to help the plasma membrane in plants to withstand stresses brought about by cold and drought. In Gaucher’s disease, glucocerebrosides accumulate in the spleen, liver, lungs, bone marrow, and brain due to a deficiency of the enzyme glucocerebrosidase. This accumulation of glucocerebroside has been associated with chemotherapy resistance. Glucocerebroside has been shown to be able to modulate membrane traffic along the endocytic pathway.
